Software Developer

RD Tuna Cannery, Madang, Papua New Guinea

August 2003 – March 2007

Developed various in-house software for the company and maintains the server that holds the backup for the company. Software developed includes the following:

- Finished Goods Recording System – A system that records all the goods produced on a particular shift. Developed in VB.net, MSSQL and Business Objects Crystal report
- E-MRS/PO Recording System – an online material requisition system that records all the requested items of particular department. The approval from department head to the division head is also done in the system. If the items requested are not available in the warehouse, the system then enables the user to prepare a canvass and PO if necessary. Developed in VB.net, MSSQL and Crystal report
- Logistics RR-MIS Recording System – records all the received item and generated the Receiving Report. Developed in VB.net, MSSQL and Crystal report
- QC Recording System – this system is connected to Finished Goods Recording system, its primary purpose is to record a QC disposition on the finish goods produced on the scheduled shift.
- Medical Records Tracking System – a system that records all employees medical history, its backend is PostgreSQL Database Server in Linux server, developed in VB.net; An updated version of this software uses Sqlite database as its backend.
- Logistics OFAL Recording System – Logistics Order Fill and Authority to Label Recording System – As this system collates all the goods with Disposition from QC, it also maintains all the data for labeling and for shipment of various labeled finished goods.
- Maintenance Job - Maintained some legacy system developed in Foxpro 2.6 For DOS such as Payroll System, Accounting System, Journal Entry Recording System, Sales and Marketing Recording System.

Software Maintenance/Developer

RD Corporation

1st Road, Calumpang, General Santos City

October 2002 – July 2003

- Developed Call Accounting System – a system that records all the call in the PABX system, storing them into Database System. The language used during development of this system is Visual Basic 6 and its backend is MSSQL. A migrated version of this is written in C#.
- Maintained the Fish Delivery Recording System – a legacy system developed in Visual Basic 6 with the backend of MSSQL. The system records all the information regarding the various transaction on receiving and selling the fish with the RD Fishing Company
- Developed a Ticket Recording System – a system that maintains the list of employees of the RD group of companies and generate a series of number for the Christmas raffle ticket. The number is distributed randomly on the given name. The system was developed using MS Access and VB6, with Crystal report 8 as its reporting API. Co authored the Penbank Payroll System – a payroll system for employees of Peninsula Rural Bank. Uses VB6, MSSQL and Crystal report 8.

Other Experience

Freelance jobs include the following:

- Created Call Accounting System which uses Python (pyserial, pywin32 – to run the code as windows service, xlrd-to generate the data in excel file) & Lighttpd as its control panel –uses python cgi Strawberry Perl for most of the CGI based scripts & Javascript (jQuery) for Ajax-based displays
- Customized the squirrelmail code (written in perl) to fit for the company website design
- Installed and maintained a Linux backup server that hosts a vsftpd FTP server.
- Maintaining SVN (subversion) server on the Linux server as a repository for various codes developed
- Configured the Linux server to run Apache server 2.0, PHP and MySQL that hosts the following :
 - Coppermine Photo Gallery – an intranet server photo album hosting for some of the company's the
 - various activity photo

Teaching Experience
Various Schools, 1997-2001

Computer Instructor

College of Information Technology
AMACLC College
cor. Pioneer Avenue- Magsaysay
Avenue General Santos City
2nd semester : (SY 2008-2009)
Subjects: Advance Router Configuration, Computer Fundamentals

Computer Instructor

Provincial Technical Institute of Agriculture
Surallah National Agricultural School
Surallah, South Cotabato
School Year 2001-2002
Subject Taught: Computer Basics

Computer Instructor

Department of Computer
Studies Iligan Capitol College
Mahayahay, Iligan City
1st Semester (SY 2000-2001) to 2nd Semester (SY 2000-2001)
Subjects: Theory of Computations, Operating Systems, Computers Systems Design, HTML Basics

Computer Instructor

Department of Engineering and Architecture
Lyceum of Iligan College
Rosario Heights, Tubod, Iligan City
1st Semester (SY 2001-2002)
Subjects: Theory of Computations, Operating Systems, Systems Organization

Computer Instructor

Math and Computer Science
Department College of Science and
Technology Notre Dame of Marbel
University Koronadal, South Cotabato
1st Semester (SY 1997-1998) to 2nd Semester (SY 1998-1999)
Subjects: Systems Analysis and Design, Intro to Computers, Basic Programming

Education

MS Computer Application (units) – 1999-
2001
18 Units of 36 units.
Mindanao State University – Iligan Institute of Technology
Tibanga, Iligan City, Philippines

BS Computer Science – 1992-1997
Notre Dame of Marbel University
Koronadal City, South Cotabato
Philippines
Full tuition scholar
